

Architectural Intern
Atlanta
Jobcode US017

We are a small architectural firm with an increasing international focus, and a niche in community development from both macro and micro perspectives. Our Atlanta based office is looking for people with 3D modeling experience to work as part of a design team. The intern will assist in carrying the design of three different projects with completely unique climate conditions from conceptual freehand drawings, into schematic design and design development, and on to the production of construction documents.

Applicants must be proficient in at least two of the following design applications:

- ArchiCAD, Revit Architecture,
- SketchUp, Photoshop CS3 or later.

The Ideal candidate will have:

- Strong interest in BIM.
- 2-4 years experience in an architecture design studio at a university with a design GPA of 3.0 or above.
- Great drive, follow-through and could lead a team of his or her peers

Applicants must be authorized to work in the United States, or could obtain a visa. This is an unpaid 60-120 day internship.
