

## **Database Programmer**

Exeter, UK  
jobcode UK023

This Erasmus/Leonardo internship would suit a talented student in computer science, looking to improve the user interface and functionality of our existing company databases. You will be working closely with the marketing/sales team to gather requirements and feedback.

As part of the software development team, your duties will include:

- Improve existing databases and user interface
- Search and integrate new applications
- Actively seek requirements and feedback from users

Knowledge, experience, skills, and competencies:

- Student or graduate in computer science with some database building experience
- Experienced and confident with HTML, CSS, Java Script, PHP and MySQL
- Knowledge of Linux (shell commands and package installation) and web design would be an advantage
- Good English
- High enthusiasm and drive coupled with good interpersonal skills
- Self-motivated and able to work on own initiative whilst being a team player
- Ability to work in a flexible environment

Further information:

Start date: as soon as possible

Duration: 4-12 months

Financial contribution: £350 on top of Leonardo/Erasmus grant

Please note that this is an EU Erasmus/Leonardo internship. Only apply if you are eligible to receive Erasmus/Leonardo funding.
