

IT/ Technical Internship

London

Duration at least 3 months

Jobcode UK019

We are a young but experienced agency providing contents and services in the media business: since 2004 we shorten the distance between video broadcasters and content producers. We are based in London but operate without borders thanks to our rich network of contacts as well as to innovative technologies which enables us to achieve high definition transmission of clips.

Our Products and Services consist of:

- A wide selection of clips updated everyday with the latest and coolest images from Rome, Los Angeles, Paris, Tokyo, Miami, London...ready to download and publish
- An ever growing online database with over 50.000 videos listed by category (Sports, Arts and Culture, Fashion, Lifestyle and Health, World News, Music, Paparazzi, Red carpet, Royals, Documentaries and Literature)
- Crews for fashion shooting sessions, events filming, interviews, documentaries as well as deliver tailored services

We also provide some consultancy by:

- Highly qualified professionals in audio-video contents' field available for your market research, facilitation and international sale intermediation, to smooth the process of sale agreement as well of video licensing
- experts in finding hidden, rare or old videos
- experts for building and implement a whole integrated marketing campaign

Requirements:

The candidates will be motivated by the opportunity to learn new skills and gain experience in their chosen field, we are looking for people with enthusiasm; good focus on detail; social; good work ethic; great communication skills, and that have a positive attitude. Computer literacy and the ability to speak a second European language are essential.

- Continued design and development and improvements of Videoplugger.com and our B2B platform www.mmnc.net and its applications such as php, c++, perl, java, html applications.
- The person has to be able to configurate and manage networks
- Good knowledge of hardware and laptops
- General knowledge of all kind of software as OS (Windows, LINUS and Mac OS)
- Desktop publishing suites (microsoft office, open office)
