

Internship in Architecture

jobcode US038

New York City

The Company:

We are a young startup architectural firm based in New York City that specializes in architecture and interior design. Prior to establishing the firm, the principal completed numerous award-winning projects internationally.

The Intern:

We are looking for talented architecture students or graduates for a minimum of 6 months - preferably 12 months - to support our competition and construction projects. The intern will work directly with the firm's principal and business manager on all projects and initiatives undertaken by the firm. Day to day responsibilities include proposal writing, preliminary design researching, 3D modeling, rendering, marketing, and executing administrative tasks. The intern will gain extensive hands-on experience in what is necessary to run and develop a small architecture firm. Working hours may vary depending on project deadline and schedule. The intern will be supervised and will receive verbal feedback that evaluates the intern's performance.

Qualifications:

Strong portfolio demonstrating creativity and design sensibility is essential. Strong communication and flexibility skills will be necessary for working with the team and for handling multiple projects. Excellent rendering skills and graphic design skills are a plus, with software proficiency in Revit, AutoCAD, Illustrator, Photoshop and InDesign.
